Projects

EdoNoRecoil and EdoCrossHair software

2018

EdoNoRecoil software designed to reduce weapon recoil in games, specifically tailored for gamers and streamers.

Achieved 30 monthly sales consistently among users and streamers in 2018.

EdoCrossHair software developed to enhance aiming precision in games, designed for gamers and streamers.

Achieved 20 monthly sales consistently among users and streamers.

Persian music bot for Discord

2020

The first Persian music bot for Discord, launched in 2020, and still active and accessible.

This bot allows users to play their desired music directly in a voice channel with seamless online functionality.

Link: <https://top.gg/bot/786519141511200799>

PGStores website

Link: <https://pgstores.ir/>

Designed the first Persian-language online server for Red Dead Redemption 2

With the launch of online servers for this game, I established the first Persian-language server, equipped with the best features and capabilities to enhance the player experience.

ETB AI bot

An AI-powered bot designed in collaboration with Edo.

Currently under development...
